Responsible for Finance, Procurement, Controlling and Billing for a Networkoperator and Provider of Telecommunication- and Internetservices

Cost-reduction experts with experience and market knowledge

Consult55 offers experience and market-knowledge of 40 man-years and cost-reduction consulting for telecommunication-services. Maintaining the customers standards we will find and negotiate case specific solutions to lower your cost for various services. Since 1991 we have worked successfully for well known telecommunication network-operators (Mobile, Radio, Fixed-Line, Data). We know the market, many project-pricings and of course we are familiar how operators calculate. Consequently we know how fair prices should look like and are experienced in negotiating on a top-level. **Our promise: No savings = No consulting-fee**

SuccessStories e.g.

SME	Fixed-Line + IP	Result = 5-digit €uro-Sum	– Increased performance, Consolidation, Weakspots eliminated
Mid-Sized	Mobile-Consulting	Result = 6-digit €uro-Sum	– Tariffoptimization Renegotiations, Supplier unchanged
Corporate	Mobile + Fixed-Line	Result = Substantial savings	– Invoicecheck + Credit notes, optimization, Supplier unchanged

Costreduction Telecommunication

Consulting-Methodology:

- | Analysis of Usage Profile + Invoiceanalysis/-control + WeakSpot-Analysis
- | Tariffnegotiations and Evaluation of RFP / RFO, Tariffoptimization + opt. Administration
- | Optimization of Tariffcombination for medium and large Mobile-Fleets (optim. Tariffmix)

Your Benefits will always exceed the consulting-fee

Money has 100 feetand that is why we offer success-based consulting services – contrary to commission-consulting!

chinese saying

No Invest + Low Risk

No daily or fixed fees – We generate our remuneration through savings

Success-based consulting lowers your „consulting-risk“ to a minimum, because the fee is savings dependent. One part of the found savings will increase the customers profits, while the other part pays for our services. At the same time our consulting model insures a high level of motivation and loyalty to the customer. And of course the customer stays in full control. You alone define requirement-profiles and will decide. We only search for solutions, analyse and prepare your way to a pragmatic and cost-effective solution.

Measurable Results

You will receive clearly measurable results.

Since Quality of service is a key factor, we only cooperate and present solutions of capable suppliers, networkoperators, providers and reseller. And of course the customer has a veto. You will see a „Before and After“ evaluation („Is“ vs. „Should-be“), estimating the different measures and remedies. We will search for weakspots, invoice-errors, an dunused services, that create unnecessary costs.

Security

Integrity and Loyalty are of utmost importance to us

„One will always meet twice in life“ – We act accordingly and will only make promises that we can keep. We will only work with depersonalised data, details of the consulting-results will not be published and we act loyal to the customer. After all the more savings for the customer, the merrier is our consulting fee. We´ll win together and so we guarantee to all our customers: **No savings = no consulting fee.**
